

English and Mathematics Webinars: Summer 2020

Due to high demand for these webinars we are pleased to repeat many of the valuable online CPD workshops in English and Mathematics, with Julie Sargent and Nathan Crook.

These short interactive sessions will take place in real time using Zoom. Offering quick but effective CPD, the workshops will include modelling under a visualiser and live discussion, questions and answers, as well as slides. Attendees will be provided with supporting documentation either in advance or after the session, and asked to gather any materials beforehand, so that they can join in practically with parts of the session.

BOOKING ESSENTIAL: Please register in advance via Eventbrite links below. Places are limited.

ENGLISH
